

Science Year 2 Knowledge Organiser

Main Learning: Animals and their habitats

Key knowledge

Know that animals have preference about the habitats they live in

Identify and name plants and animals in a range of habitats

Know how a specific habitat provides for the basic needs of things living there

Match living things to their habitat

Know how animals find their food

Name some different sources of food for animals

Vocabulary

habitat

Is a place that an animal lives. It provides the animal with food, water and shelter

rainforest

A habitat with a tropical forest with tall trees, warm climates and lots of rain

desert

A habitat that gets very little rain each year. Very few plants or animals live in desert areas

species

A group of animals, plants or other living things that all share common characteristics and that are all classified as alike in some way

pond

A body of water smaller than a lake. Ponds provide a habitat for a very wide range of wildlife

indigenous

Produced, growing, living, or occurring naturally in a particular region or environment
